

**CLEANING INSTRUCTIONS
TO CLEAN FABRIC BACKED VINYL WALLCOVERING**

Following is a list of the solutions (in the preferred order of use) that can be used for cleaning Colour&Design Wallcovering.

- 1) Clean warm water.
- 2) Mild soapy water, then rinse.
- 3) Isopropyl Alcohol (a.k.a. Rubbing Alcohol).

Do not use solvent based cleaning agents, lacquer thinners, nail polish remover, pine oil or cleaning agents containing sodium hydrochlorite (bleach), which may cause discoloration over a period of time.

You will find these directions on each hanging instruction sheet supplied with each roll of wallcovering.

NOTE: Use a moist natural sponge *not a man made polyester sponge* when cleaning the vinyl surface.
